

**FiliBuster**, has been based the on ClockWatch, to provide a simple yet effective timing solution for public meetings and debates, where a clear visual display of elapsed time is required.

Designed for use with the CombiTower (but not exclusively) this system will give everyone a good clear signal of when to begin and cease talking.

The unit is AC Mains powered, and has 2 XLR connectors for the Big , Standard and Mini numeric displays as well as the CombiLamp and CombiTower, to give a tailored system for your presenters to run to time.

Complete with 4 memory locations for fast preprogrammed times, and the FiliBuster will also count past zero when in countdown mode.
